

# DUBOIS INTEGRITY ACADEMY

Mobile Modular provided the DuBois Integrity Academy with modular construction for its charter school in order to meet an aggressive timeline.

## THE CHALLENGE

To build a facility that would accommodate all of their projected students in this time frame, they needed a solution that would both meet their budget and timeline, as well as projected growth. The overall project design then went through multiple iterations, with a budget that was both driven by the anticipated student count and limited due to a site that required significant grading work to become suitable for use as an educational facility.

**Customer Name:** DuBois Integrity Academy

**Project Location:** Riverdale, GA

**Building Type(s):** Modular Classrooms

**Job Type:** Sale

**Total Sq. Ft:** 37,300 sq. ft.

## THE SOLUTION

The DuBois Integrity Academy ultimately chose to utilize modular construction through Mobile Modular to complete the school on an aggressive timeline. The innovative Phase One design of the DuBois Integrity Academy consisted of a 25,000 SF permanently installed building that housed approximately 400 students. To accommodate future growth, the building was engineered to have the ability to add a modular second-floor addition to help minimize the initial construction cost.
