

# SCHOOL DISTRICT MODERNIZES HISTORIC HIGH SCHOOL

Mobile Modular delivers a temporary campus during the renovation and modernization of a historic high school.

## THE CHALLENGE

In 2009-2010, a school district renovated a historic high school building from the 1930s. Mobile Modular provided a temporary modular space solution for students and teachers during the renovation.

The school district outlined several needs for the temporary campus:

- Keeping the students under a single roof, maintaining a campus feel
- Providing a safe and secure learning environment
- Efficient use of limited land space
- Critical seven (7) week turn-around to get ready for the 2009-2010 school year

## THE SOLUTION

Mobile Modular designed and installed a modular campus in less than seven weeks, providing a safe and secure learning environment for students, teachers, and staff during the 2009-2010 school year. The campus included a creative combination of modular buildings strategically placed on limited land available in an inner-city setting. It featured state-of-the-art, eco-friendly prefabricated classroom complexes and additional administrative and multi-use prefabricated buildings.
