

WELLSPAN HEALTH AND SURGERY

Mobile Modular designed a cohesive, architecturally aesthetic modular imaging building for WellSpan Health and Surgery Center.

THE CHALLENGE

WellSpan Health & Surgery Center required the addition of an MRI unit to their existing facility. Originally, WellSpan was looking to add a mobile imaging trailer to fulfill their need. Due to limited space and cost, Mobile Modular was contacted to provide a solution for a permanent building to house a Philips Ingenia Elition 3.0T X MRI.

Customer Name: WellSpan Health and Surgery

Project Location: Pennsylvania

Building Type(s): Modular Healthcare

Job Type: Sale

Total Sq. Ft: 855 sq. ft.

THE SOLUTION

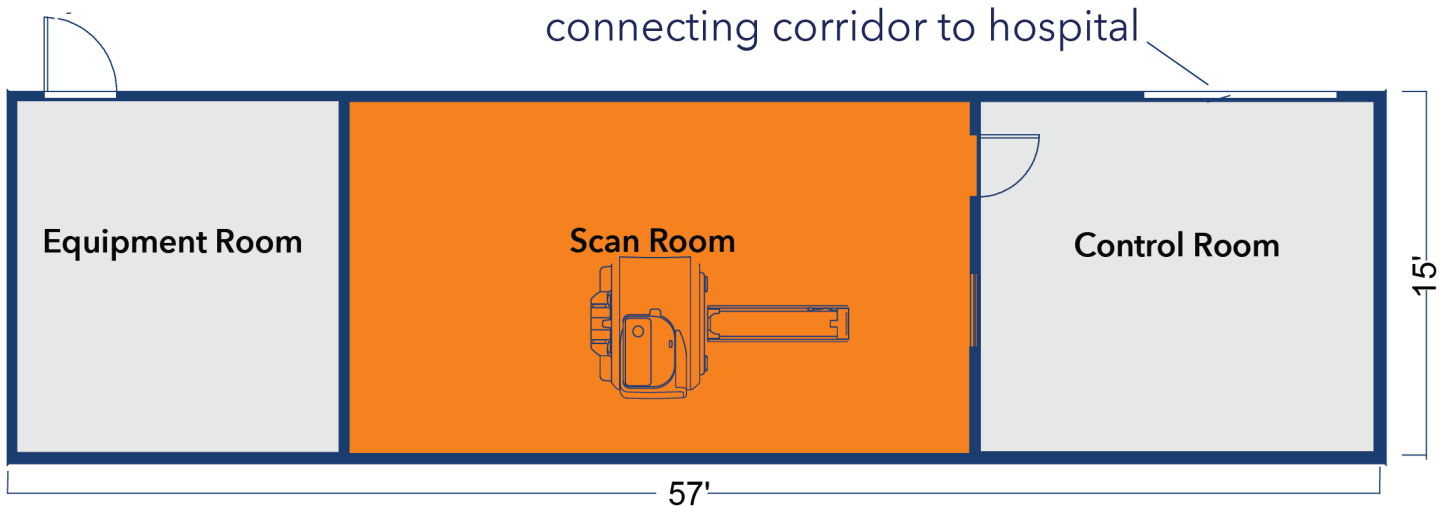

With a brick exterior, the modular building blends effortlessly into the overall medical center. Modular construction proved to be an effective solution because not only did it minimize operational disruption, it also allowed site work to progress concurrently with the fabrication of the modular unit, thereby reducing the project schedule.
