

# WINTHROP UNIVERSITY HOSPITAL EXPANSION

Mobile Modular created a modular level one trauma center for Winthrop University Hospital to help minimize the impact on infection control.

# EMERGENCY

## THE CHALLENGE

Winthrop-University Hospital was looking to add a Level One Trauma Center to the emergency department that would be able to treat both children and adult trauma patients. The addition needed to be located adjacent to the existing emergency department, but not impact the operations of the emergency department for an extended period of time.

**Customer Name:** Winthrop University

**Project Location:** Nassau County, NY

**Building Type(s):** Modular Healthcare

**Job Type:** Sale

**Total Sq. Ft:** 3,400 sq. ft.

## THE SOLUTION

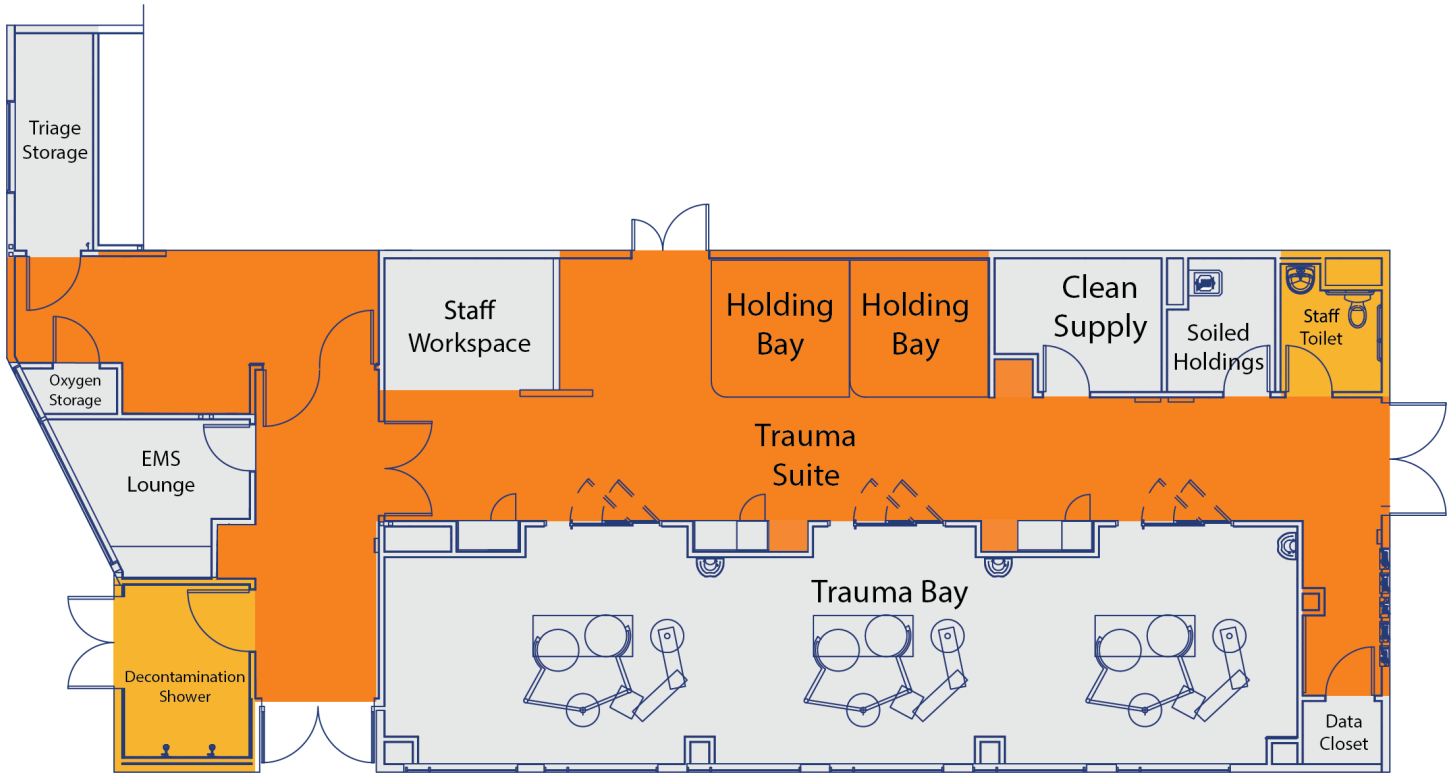

The hospital chose modular construction to keep a majority of the construction activity away from the hospital and minimize the potential impact on infection control. By utilizing modular construction, a majority of the building was constructed off-site. The result was a 3,400 SF Level One Trauma Center addition which is now the only trauma center in Nassau County, Long Island that will be able to treat both children and adult trauma patients.
