

# MOBILE MODULAR AIR CARE SOLUTIONS

IMPROVE THE AIR QUALITY IN YOUR CLASSROOM OR OFFICE

**Indoor air quality inside a building or structure can have a big impact on the health and well-being of occupants.** We make it easy to reduce airborne pollutants and improve air quality inside your modular building with our air care solutions. Our team of specialists will assist you in finding the right solution to ensure your HVAC unit distributes cleaner air while improving system performance.

## Solutions

### Filter Replacement Programs

With our hassle-free HVAC Filter Replacement Programs you will receive regularly scheduled deliveries of filters for your heating and cooling system. Our Plus program offers regularly scheduled filter deliveries plus a service tech will provide a routine inspection at your convenience. Our filter programs assist in easing the burden of remembering to regularly change your filters while maximizing unit efficiency to avoid unit interruption.

### UV Light Purification Systems

UV lighting removes contaminants with ultraviolet light rays and inactivate bacteria as it passes through the HVAC unit. The air distributed from your unit is up to 88% clean of certain viruses and common allergens. UV lighting is recommended by ASHRAE and the CDC to help protect against the spread of viruses.

### Commercial Room Ventilators

CRV's are electromechanical vent systems that circulate outdoor air into your modular building to help meet indoor air quality standards. Adding a CRV to your current system increases efficiency and performance when heating and cooling your building.
