

# BRECKENRIDGE ISD CLASSROOMS

Mobile Modular helped Breckenridge ISD replace a multi-classroom modular building starting with the demo and removal to the design and installation.

## THE CHALLENGE

Breckenridge ISD requested quotations for a multi-classroom modular building to replace older buildings at the South Elementary School.

## THE SOLUTION

The Mobile Modular team was contracted to demo and remove the existing buildings, pour the pad for the new building and subsequent grading as well as designing, manufacturing, delivering, and installing the new 6,144sf six-classroom modular building.

The building was designed to be comparable to site-built buildings in life span, maintenance, aesthetics, and function but still reap the benefits of a modular construction approach: the total time to completion for the project was 90 days.

**Customer Name:** Breckenridge ISD  
**Project Location:** Breckenridge, TX  
**Building Type(s):** Modular Classrooms  
**Job Type:** Sale  
**Total Sq. Ft.:** 6,144sq. ft.
