

THE HILL SCHOOL MODULAR DORMITORY

Mobile Modular provided a temporary dormitory space for The Hill School to support the growing student population.

THE CHALLENGE

The Hill School, a private boarding high school, had an immediate need for additional dormitory space to support a growing student population and plans to renovate existing dorms in the future.

THE SOLUTION

Mobile Modular came up with a unique floorplan that housed 28 students, 1 staff room, and 1 family staff room with a lounge space, laundry facilities, gang restrooms, and a gender-neutral restroom. The building is approximately 7000 sf, consisting of 14 modules set as a single story. The challenge was the site location, which was overlooking a dell and an underground creek, therefore no work could be done below grade. The school elected to use a site-installed faux ledge-stone skirt around the perimeter to make the building stand out, as well as TREX decking and ramps to match the campus aesthetic. The new "Dellside Dorm" is a space for students to live comfortably so they can focus on their education.

Customer Name: The Hill School
